

**> Ula, Norway**

Description	BP Norge's main living quarter at the Ekofisk complex was due to be removed in 2005, but major construction work has helped to prolong its lifespan until 2028.
Location	North Sea
Time frame	2005 -2008
Client	BP Norge
Order volume	8,0 million euros
KAEFER services	Feasibility studies, removal of old structures, construction of new cabins and bathroom units, engineering, prefabrication, installation, documentation for all disciplines involved
Challenges	Installation during platform operation with high manning levels.
Our solution	Installation scheduled for lower manning periods; i.e. Easter and Christ
Advantages for the client	KAEFER IKM was able to supply and coordinate a wide range of services that helped BP Norge to extend the lifespan of its platform for 23 years.
Contact	KAEFER ENERGY AS
