

**> Snøhvit, Norway**

Description	Services for the development of Norway's fifth-largest gas field
Location	Hammerfest LNG Terminal is located on a small island just outside the city of Hammerfest. The Snøhvit field is located 140 km northwest of Hammerfest in Barents Sea
Time frame	2003 - 2007
Client	StatoilHydro
Order volume	300 million euros
KAEFER services	Insulation, scaffolding, surface protection
Challenges	Extremely rough climate conditions. Also, for several months the average number of KAEFER workers needed at Snøhvit topped 1800.
Our solution	KAEFER IKM performed the work within a joint venture with Aker Kvaerner and also involved KAEFER employees from Spain and various other countries in addition to the Norwegian personnel.
Advantages for the client	The project was organised as an integrated team where all disciplines in such a project participated on an equal level and good flexibility was achieved.
