

> **“Tonnerre” and “Mistral” , Brest (France)**

Project Description	Known as BPC (Batiment de projection et de commandement), these large ships belong to the latest amphibious ship class, carrying troops, landing craft and helicopters
Location	Brest, France
Construction Period	2007-2008
Ship-Owner	French Navy
Shipyards	Aker Yards
MML services	Repair work: dismantling of furniture and wall panelling in the living quarters so that the flooring could be replaced
Challenges	Removing the furniture and panelling without damaging it, so that it could be reused, minimizing dust whilst replacing the floor to avoid spreading it all over the ship
Our Solution	Well planned work organization, area protection as done in asbestos removal
Advantage for the Customer	Ships suffered no further damage, panels and furniture could be reused
Contact	KAEFER WANNER Shipbuilding, St. Nazaire, France
