

KAEFER

> **VWS 2500.3, Stralsund (Germany)**

Project Description	New building of ten merchant vessels as modified continuation of an original series
Location	Stralsund (Germany)
Construction Period	From October 2007 to February 2009
Shipping Company	Maersk
Shipyard	Volkswerft Stralsund
KAEFER services	Insulation/Sheathing of ceilings, walls and tanks, floating floors, noise protection, insulation of pipes and flues as well as sheathing and jacketing, installation of galleys and refrigerated rooms incl. stainless steel shelving, installation of wall and ceiling panels, finishing and fitting of all living and working areas incl. installation of furniture and shelves
Challenges	As the vessels are built in a 50-day interval, KAEFER has to work on four vessels simultaneously, even though they are at different stages of construction. The deckhouses are built at separate building sites, sometimes three at the same time.
Our Solution	Precise scheduling in close collaboration with all the contractors involved, accomplishing the job thoroughly and reacting flexibly to all kinds of challenges
Benefit for the Customer	KAEFER has a great deal of experience with this type of ship, as it has already worked customer on 22 of them.
Contact	KAEFER Schiffsausbau GmbH, Stralsund, Germany
